

## **Hammer & Steel® Reaffirms Commitment to Providing the Most Productive Solutions to Build the Foundation of America Through Strategic Manufacturing Partnerships**

**Hazelwood, Missouri – January 1, 2026** – Hammer & Steel, North America's premier provider of foundation construction equipment and solutions, today reaffirmed its strategic commitment to providing the most productive solutions to build the foundation of America through continued collaboration with its world-class manufacturing partners. Today, Hammer & Steel announced a new partner to their portfolio:

*“Our strategy: continue partnering with the world's best manufacturers to bring the most productive, reliable, and innovative foundation solutions to the contractors building America's future”* – Robert Strobing, CEO Hammer & Steel.

As infrastructure demands across the United States continue to grow, Hammer & Steel remains dedicated to equipping contractors with cutting-edge technology and equipment that maximizes productivity, safety, and efficiency on every jobsite. This commitment is made possible through the company's longstanding partnerships with internationally recognized manufacturers: ABI Gruppe, Comacchio, Delmag, Scandinavian Pile Driving AB, PTC Fayat, Eurodrill, Kemsolid, STS Schetzke and [now] Movax.

*“Movax strategy is continued growth on a global market. Growth can, however, only be accomplished with strong, skilled and established local partners. Hammer & Steel is without a doubt the perfect partner for Movax on the most important piling & foundation equipment market in the world”* – Lasse Mannola, CEO Movax

Each manufacturing partnership brings specialized expertise and proven technology to address the diverse challenges of modern foundation construction:

- [\*\*ABI Gruppe\*\*](#) – Advanced piling and drilling equipment with Mobilram solution.

- [Comacchio](#) – Versatile drilling rigs and foundation equipment
- [Movax](#) – Innovative modular excavator attachments for vibrating and impacting
- [Delmag](#) – High-performance drill rigs and diesel pile hammers
- [Scandinavian Pile Driving AB](#) – Innovative pile driving and extraction solutions
- [PTC](#) – Crane suspended vibratory hammer
- [Eurodrill](#) – Specialized drilling systems
- [Kemsolid](#) – Soil mixing, shoring and ground improvement solutions
- [STS Scheltzke](#) – Precision pile driving equipment
- [Dawson](#) – Hydraulic impact hammers

*“These partnerships represent more than just equipment distribution; they represent our promise to contractors that they will have access to the best tools available backed by Hammer & Steel’s unmatched nationwide service and parts network”* Nick Laurence, EVP.

As the nation invests in critical infrastructure projects—from bridges and highways to renewable energy installations and commercial developments—Hammer & Steel’s comprehensive equipment portfolio ensures contractors can tackle any foundation challenge with confidence and efficiency.

#### **About Hammer & Steel®**
